## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 25 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tanaka.

Regarding claim 25, Tanaka (Figs. 1 and 2) teaches a lens barrel comprising a stationary barrel (11), a driving ring (13) which is supported by the stationary barrel to move in a direction of an optical axis of a lens ( L1 or L2 or L3) while rotating about the optical axis relative to the stationary barrel, and a first movable ring (14) which supports a first lens group (L1 or L2 or L3), the first movable ring (14) being supported on the drive ring (13). The drive ring and the first movable ring move together in the optical axis direction, and rotate relative to each other ( see column 6, lines 35-38).

### *Allowable Subject Matter*

Claims 1-24, and 33-49 are allowed. Among these claims, independent claim 33 contains subject matter similar to that of independent claim 25 (which is now rejected), but the movable ring of claim 33 is not intended to be rotated about the optical axis when the drive ring is rotated. The scopes of independent claims 1, 8, 18, and 41 are narrower than those of claims 25 and 33.

Art Unit: 2873

Claims 26-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Communication*

Any inquiry concerning this communication should be directed to Loha Ben at telephone number (703)308-4820.
